

Dynamic International Cybersecurity Professionals' Network

Combatting Cybercrime

Cybercrime is exploding in frequency and sophistication worldwide. Attacks cross international jurisdictions and timezones to hold targets hostage anywhere at anytime.

The **Cybersecurity Advisors Network (CyAN)** aims to strengthen cybersecurity and fight cybercrime by **connecting cybersecurity experts** from different backgrounds and regions across the globe.

International Networking and Cooperation

CyAN's multidisciplinary network connects elite cybersecurity advisors with local and international peers and businesses to cooperatively improve **cybersecurity** and cyber literacy.

Who We Are

People perpetrate cybercrime, and ultimately, its victims are people too. Therefore, a **multidisciplinary** approach is at the heart of CyAN's structure and purpose. **CyAN's expert and professional members** hail from a wide range of **disciplines and experiences**. CyAN comprises academics, lawyers, business specialists, strategy and risk assessors, telecommunications experts, and IT authorities.

Real-World Action

CyAN leverages its members' reputations, knowledge, and connections to engage in multiple initiatives around the world. **The Zero-Day Researcher Protection initiative** is one such example that seeks to enact positive change for good actors in cybersecurity through **cooperation** with governmental and industry **policymakers**.

Tangible Benefits

CyAN provides members with **speaking** opportunities, professional and casual **events**, professional development, and **podcast** and video interview **opportunities**.

Influential Alliances

CyAN is partnered with **multiple leading organisations** and institutions such as the The European Security Forum, Global Encryption Coalition, GFCE, FIC, CYBERSEC, and Cyber Peace Institute.
